SUBJECT: Support for legislation requiring labelling of genetically modified foods

[Message]

Dear Mr. Prez: I am writing to ask for your support in passing legislation which would require any food which is genetically modified or contains ingredients which have been genetically modified to be labelled as such.

It should be clear to any intelligent person that genetic modification of foods could have dire health consequences to those who consume such foods, and that not nearly enough testing has been done to have such foods considered "safe". I, personally, feel that genetic modification is wrong and should not be allowed, however, the public at least deserves to have the right to know what is in their food.

Thank you for your help.
